In the midst of World War II, as the Allies desperately fought to break the German Enigma code, a young woman named Joan Clarke found herself drawn into a world of secrets and danger.

Joan was a brilliant mathematician who had been recruited to work at Bletchley Park, the top-secret British codebreaking center. There, she met and fell in love with Alan Turing, the eccentric and brilliant mathematician who led the Enigma codebreaking team.

As Joan and Alan's relationship blossomed, so too did the dangers they faced. The Germans were determined to protect the Enigma code at all costs, and they were willing to kill anyone who got in their way.

Joan and Alan's love was tested to the limit as they risked their lives to break the Enigma code. But even if they succeeded, would their love

survive the war?

Turing Delirium is a gripping novel that explores the complex relationship between love, loss, and the Enigma Machine. It is a story of courage, sacrifice, and the enduring power of love.

About the Author

Lisa Carter is a bestselling author of historical fiction. She has written several novels about the women who worked at Bletchley Park during World War II. Her work has been praised for its historical accuracy, its strong characters, and its suspenseful plots.

Praise for Turing Delirium

"A gripping tale of love, loss, and the Enigma Machine. Carter has written a masterpiece." - The New York Times

"A must-read for fans of historical fiction and suspense." - The Washington Post

"A powerful and moving story that will stay with you long after you finish it." - The Guardian
